

GREENMIX

A BALANCED COMPLEX OF CHELATED MICROELEMENTS AND MAGNESIUM

GREENMIX is a water-soluble mineral product in powder form containing magnesium and trace elements, essential for the most important biochemical plant reactions.

The formula is ideal in foliar application to prevent and to cure the deficiencies of magnesium and trace elements and to improve the metabolic efficiency of plants.

Thanks to the iron content, **GREENMIX** prevents and cures chlorosis. In fertigation it can be applied alone or in mixture with liquid and water-soluble fertilizers.

WHY CHOOSE GREENMIX

- 1 Relevant content of magnesium
- 2 Fully supply of micronutrients
- 3 High compatibility with fertigation products
